### Industrial Constructors/Managers, Inc. Adds Nine Ironworkers to Grow Structural Steel Team

*Ironworkers come from Ridge Erection, a union-certified steel erection company that specializes in commercial ironworking*

**Denver, CO, December 17, 2020** – [Industrial Constructors/Managers, Inc. \(ICM\)](#), a Class A General Contractor specializing in industrial construction and plant maintenance, today announced that nine ironworkers from [Ridge Erection](#) will be joining ICM to help grow the company's structural steel business. Ridge Erection employees are making the change as a result of the company deciding to close its doors after operating for roughly 60 years.

“Company-wide, ICM had roughly 25 ironworkers before Ridge Erection joined the team, with about 10 based here in Denver,” said Jamie Hodges, executive vice president of ICM. “The addition of Ridge Erection bumps that number up to 34 ironworkers statewide and 19 here in Denver, giving ICM the opportunity to greatly expand our capacity and enable us to pursue more steel-based commercial projects, especially here in the Denver-metro area. We’re excited to incorporate Ridge Erection employees into the family and bring them up to speed on the exemplary service and safety standards our clients have come to expect from ICM.”

With over 60 years in the steel erection business, Ridge Erection has been at the forefront of commercial steel erection, working in Denver and across the U.S. The company commonly utilized a mix of structural steel, miscellaneous steel, precast erection and heavy rigging. Some of their top projects included Charis Bible College Auditorium, an addition to the Pepsi Center, the Spire Condos, the Kittredge Dormitory at CU Boulder and the Alamo Drafthouse Cinema at Aspen Grove.

“As one of the oldest steel erection companies in town, we’re sad to close our doors but also excited to join forces with ICM who has a stellar track record of not just steel erection, but also steel fabrication, design build, equipment installation and machining, among many other services,” said Vernon Dugger, president of Ridge Erection. “Our ironworkers, who each have 20-30 years of experience, bring a wealth of knowledge and expertise, which will help ICM grow it’s team and diversify its skillset.”

ICM has been in business since 1983, providing turnkey, fast-track solutions for all types of structural steel needs - from new structural steel, plant expansions and equipment support to fabrication and installations and the retrofitting of safety and access platforms, handrails and stairs. Some of the company's recent steel projects include the Coors Brewery expansion, CSU

Pueblo's weight training facility, Parkview Medical Center's six-story addition and the structural steel for CSU Martin Drakes new scrubbers.
